

## PRESS RELEASE

December 2011

# Husqvarna's new robotic crushers – the fastest crushers in their class

*Powerful and the widest jaw opening on the market. The new crushers DCR 300 and DCR 100 take Husqvarna Construction's robots to even bigger heights when it comes to demolition machines. "Our powerful crushers widen the usage range for our robots", says Lars Gustafsson, Global Product Manager, Construction Equipment, Husqvarna Construction Products.*

Husqvarna's demolition robots have, in a short period of time, become very popular in the construction industry. Now the company launches robotic crushers that further enhance the machines' usability. The crushers DCR 300 and DCR 100 have a crushing force of a massive 45 and 34 tonnes, respectively. Husqvarna's crushers are also equipped with a deep and wide jaw opening and the capacity to get through walls of 430 or 425 millimetres respectively. This means that the user can do his job both easier and faster.

"This is a welcome addition to the demolition machines. Our robots equipped with our own crushers is the most powerful solution on the market", says Lars Gustafsson, Global Product

manager for Construction Equipment at Husqvarna Construction.

Both the DCR 300 and the DCR 100 are typical Husqvarna products with a thought through, robust design and innovative solutions. Both crushers have an excellent power-to-weight ratio. The crushers can be equipped with crushing tips in the middle of the crusher, grinding the concrete even more effectively. The metal cutters in the back of the jaw makes it possible to cut thicker rebars. The crushers are easily serviced, for example, the tips on the DCR 300 are detachable. The DCR 100 has two pre-sets for the jaws, thus giving it an even wider range of use. ▶

**More efficient.** *The new crushers take Husqvarna's robots to even bigger heights when it comes to demolition machines.*

**HUSQVARNA CONSTRUCTION PRODUCTS**

**DCR 300.** *The bigger of the new crushers has a crushing force of 45 tonnes.*

#### **Husqvarna DCR 300**

- Fits Husqvarna DXR 310 and Husqvarna DXR 250
- The most powerful crusher in its class
- Crushing force: 45 tonnes
- High power-to-weight ratio
- Weight: 274 kg (incl. adapter plate and hoses)
- Robust design
- Depth: 195 mm
- Maximum jaw opening: 430 mm

**DCR 100.** *The smaller crusher has two jaw opening settings, which gives it an even wider range of use.*

#### **Husqvarna DCR 100**

- Fits Husqvarna DXR 140
- Weight: 192 kg (incl. adapter plate and hoses)
- Crushing force: 34 ton
- Capacity to cut through 400 millimetres walls
- Two jaw opening settings: 320 and 425 millimetres.
- Depth: 185 mm
