

Secure. Husqvarna's new, powerful cutter K 1260 lets you do the heavy jobs quickly, accurately and efficiently.

Husqvarna K 1260 – a powerhouse for fast, smooth cutting

The new Husqvarna K 1260 is one of the most powerful cutters on the market. Stable with good ergonomic design and boasting smart solutions from the inside out makes it the cutting and drilling professional's perfect partner.

An effective, powerful machine can be the difference between long, stressful hours at work and swift, effective operations. Husqvarna's powerhouse K 1260 was developed to simplify the work of the user. The cutter, which is suitable for the toughest jobs on heavy materials such as concrete, stone or asphalt, is packed with features and technologies for maximum performance and user comfort. By placing the machine on a cutting trolley the user can concentrate fully on the cutting process.

"The biggest advantage with this machine is without doubt its power output. It does a perfect job in the shortest possible time," says Johan Simonsson, Global Product Manager for Power Cutters at Husqvarna Construction Products.

Great significance was attached to the machine's ergonomics and user friendliness. The

curved design makes it easy to work with the machine close to your body and gives the user better control. The thicker handles at the front provide better grip.

In addition to its powerful engine, the K 1260 boasts the new generation of Active Air Filtration™. It can be operated for up to one year without requiring a filter change leading to increased cost savings. The machine is also fitted with SmartCarb™ – automatic filter compensation which results in higher performance and reduced fuel consumption, as well as one of the market's most efficient vibration dampening systems which reduces vibrations to less than 5m/s².

The K 1260 is also equipped with DEX, a water-saving wet cutting kit for efficient dust management, which provides a cleaner cutting process with less water usage and slurry. ▶

More facts on the K 1260

- K 1260 Rail is fitted both with Active Air filtration™ and SmartCarb™, which increases performance, reduces fuel consumption and extends product life. This makes for a more cost effective power cutter.
- Improved ergonomics with for instance a new, rounded design which makes it easier to work with the machine closer to the body. Specially designed handles for comfortable use.
- Easy to service Torx screws.
- Power output: 5.8 kW.
- Cylinder displacement: 119 cm³.
- Blade diameter: 350/400 mm.
- Max. cutting depth: 125/145 mm.
- Weight (excl. cutting equipment): 13.7/14.4 kg.
- Sound level: 103 db(A)

Accessories. For the K 1260, there is a compact, specially designed cutting trolley, KV 970/1260. The quick mountings make it easy to install the cutter on the trolley, which is easy to fold up and transport.

Cleaner. DEX, Husqvarna's dust management system with the electrical WT 15 water tank, together with the water-saving wet cutting kit, makes for a cleaner cutting with reduced water and slurry volumes.
