

Facilitates. *The Husqvarna K 1260 Rail was developed specifically for maintenance work for instance on railways.*

Husqvarna K 1260 Rail – perfectly designed for rail cutting

Husqvarna's new rail cutter, the K 1260 Rail, is the answer to problems with heavy and bulky cutting equipment. It combines efficiency and a powerful engine with revolutionary technological solutions. With the K 1260 Rail the user can achieve more with less effort.

Husqvarna launches the K 1260 Rail – a powerful, efficient petrol-driven rail cutter. It has an impressive weight/output ratio and was specially designed for rail cutting, maintenance work on railways and tram tracks, where precision and speed are decisive factors. The machine is fitted with numerous technical features which facilitates cutting work: Double attachment mountings enable cutting from both directions. The attachment mounts quickly and firmly to the rail. As both the engine body and the attachment mountings were developed simultaneously, output and precision were fully optimised, right from the design stage.

“With the K 1260 Rail, it is all about possibilities instead of limitations. This is a rail cutter that is perfectly customised for rail cutting – it cuts fast

and straight, and thanks to the double attachment mountings it can cut from any direction which is a great benefit if, for example, cutting at railway switches,” says Johan Simonsson, Global Product Manager for Power Cutters at Husqvarna Construction.

The K 1260 Rail is fitted with technology which is more cost effective for users: The new generation of Active Air Filtration™ delivers up to one year's operation without a filter change. The machine is also fitted with SmartCarb™, a built-in automatic filter compensation, which maintains high power and lowers fuel consumption.

Starting the K 1260 Rail is easy with EasyStart and is comfortable to use, even for longer periods, due to one of the market's highly efficient vibration dampening systems. ▶

More facts on the K 1260 Rail

- K 1260 Rail is fitted both with Active Air filtration™ and SmartCarb™, which increases performance, reduces fuel consumption and extends product life. This makes for a more cost effective machine.
- Easy to service Torx screws.
- Improved ergonomics for instance a new design, and specially designed handles for comfortable use.
- Power output: 5.8 kW.
- Cylinder displacement: 119 cm³.
- Blade diameter: 350/400 mm.
- Max. cutting depth: 125/145 mm.
- Weight with RA 10 (excl. cutting equipment): 20.5/21.1 kg.
- Weight, Rail Attachment 5.5/5.7 kg.
- Sound level: 101 dB(A).

Two directions. Due to its double attachment mountings, the K 1260 Rail can cut in both directions, which makes the user's work significantly easier.
