HUSQVARNA LAUNCHES ITS MOST VERSATILE BRUSHCUTTER

For landowners and professionals requiring a brushcutter that offers optimal performance and efficiency to tackle multiple applications, the new Husqvarna 343FR is the ideal product.

Designed with long working shifts in mind, the new brushcutter is ergonomically designed and offers superior durability and performance. Equipped with a trimmer head, grass blade and saw blade, the Husqvarna 343FR brushcutter provides landowners the versatility of a grass trimmer, brushcutter and clearing saw in one effective package. "Switching the cutting equipment is made easier with the magnetic locking pin holder, so you can change your cutting equipment quickly and easily," says Ian Hay, Product Manager for Husqvarna Australia.

Featuring an E-TECH® II engine, which effectively reduces exhaust emissions without compromising on power, the 343FR delivers high performance and with an optimized centre of gravity thanks to the fuel tank placement in front of the engine.

The new brushcutter also features LowVib anti-vibration dampeners that absorb vibration for maximum comfort and control, plus an angled handle bar and comfort handles for excellent grip and working position.

Another key ergonomic feature of the 343FR package is the unique Trio-Balance™ harness, which effectively spreads the weight of the machine over a larger area and helps to maximise its balance. "The broad back support distributes to load evenly and the hip belt features a shock-absorbing hip pad for operator comfort, allowing you to work for longer periods without interruption," explains Ian.

Technical information

Husqvarna 343FR

Displacement..... 45.0 cc
Max power..... 2.0 kW
Weight 8.2 kg
