

**HUSQVARNA AUTOMOWER®**

# Don't mow the lawn, enjoy a performance.

*We believe that there is more to life than mowing the lawn. That is why we have created the world's first fully robotic lawn mowers. The minute you switch it on, you are free to switch off, knowing that Husqvarna Automower® is giving you a superior lawn.*

*From the simplest of lawns to complex, undulating gardens, this robotic lawnmower delivers superb performance, outstanding results and because it is such an intelligent product, new levels of user freedom.*

*In addition, our new 260 ACX model, is designed for those who want a great looking lawn in a business environment, without the labour. It can even be programmed to send you information by text message.*

## **A beautiful lawn.**

Three razor like blades cut the grass cleanly rather than tearing it off. Husqvarna Automower® also cuts more often, which produces shorter clippings. This in turn means better fertilizing. When combined with an irregular cutting pattern and wheels that offer outstanding grip, the result is a lawn surface you've always wanted.

## **User freedom.**

Husqvarna Automower® is equipped with a range of handy functions that combine optimal performance with user freedom. Programming is as easy as personalising a mobile phone and when this is complete, the robotic mower carries out its work quietly, safely and effectively and charges itself when required, even when you are not at home.

## **Simple set up.**

The working area is defined with the help of a low voltage boundary wire, which is easily laid out around the desired cutting area using the equipment provided. This ensures that Husqvarna Automower® will cut evenly and safely up to borders. Flowerbeds and other areas to be avoided are protected using the same wire.

## **Safety first.**

If the mower is lifted off the ground or tips over, the cutting blade automatically shuts off. In addition, the cutting blades are placed far from the edge of the machine so if Husqvarna Automower® meets an obstacle it will stop and redirect itself without causing any damage.

## **Greener, quieter and more cost effective.**

Efficient energy management means low energy consumption, allowing Husqvarna Automower® to operate at a fraction of the cost of conventional lawnmowers. Because it is electrically powered, it produces no harmful exhaust emissions. It is also extremely quiet and works discreetly exactly when you want it to. This means your quiet afternoon in the garden will never be disturbed again.

# Quiet, reliable and never leaves the office.

## HUSQVARNA AUTOMOWER® 260 ACX.

Now you can have a perfectly cut lawn around your premises – permanently – without the usual cost and inconvenience of traditional mowing. Imagine being able to manage your lawn and grassed areas without spending money on labour. The ultimate in lawn care, the ultimate in cost efficiency and productivity.

Day or night, rain or shine, it simply gets on with the job of mowing, leaving you free to get on with managing a business.

Like all Husqvarna's robotic mowers, Husqvarna Automower® 260 ACX operates itself without the need for supervision. It contains all of the main features of the range, including an anti-theft alarm and programmable functions.

## A smart business decision.

However, what makes this product different is its ability to comfortably mow 5500 m<sup>2</sup> of grass. In addition, it has an ultrasonic sensor which makes it reduce speed when obstacles cross its path, thus reducing its impact with them. It also has a text message function, which enables it to contact you via your mobile phone when a working session has been completed.

## A silent revolution at work.

With no harmful exhaust emissions and low energy consumption, it is gentle on the environment as well as your wallet. It is also quiet and discreet, making it just as easy on the ears.

Making Husqvarna Automower® 260 ACX part of your workforce could be this year's smartest business decision.

With no requirement of labour or human supervision and low noise levels, Husqvarna Automower® 260 ACX is perfect in the following business environments:

- Shops and retail premises.
- Hospitals.
- Hotels and leisure facilities.
- Golf courses, football fields, and other sports facilities.
- Offices and other business locations.
- Conference facilities.

**We use energy from the sun,  
so you can recharge your batteries.**

**HUSQVARNA AUTOMOWER® SOLAR HYBRID.**

Solar Hybrid is the world's first fully robotic lawn mower that is partly powered by the sun. Brilliant for your lawn, great for your conscience, better for the planet.

The product uses considerably less energy than any conventional mower. That's because in addition to a charging station, it comes with a large integrated solar panel.

When there is daylight available, the solar cells enable the mower to extend its cutting periods before it needs recharging. That means a cut lawn in a shorter time, even lower power consumption and an extended battery life. So now it takes even less energy to mow the lawn.

**Add some colour to your lawn.**

\* Automower® Colour Collection available for 230 ACX and 220 AC.

**HUSQVARNA AUTOMOWER® 230 ACX.**

Exclusive design and features meet high performance. 230 ACX has a cutting capacity up to 3 000 m<sup>2</sup>, fast automatic charging, backlit keypad, and an anti-theft alarm. Dual guide wires make light work of complex lawn areas while extra wheel traction increases performance on sloping lawns. The result is a lawn surface of outstanding quality.

**HUSQVARNA AUTOMOWER® 220 AC.**

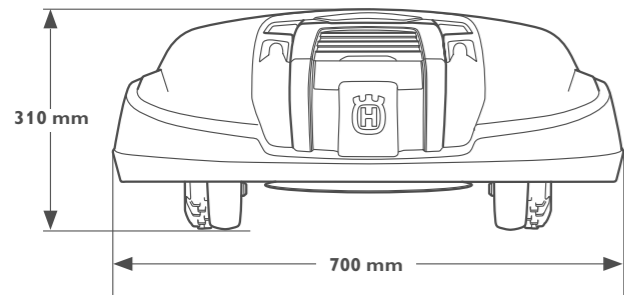

220 AC's 1 800 m<sup>2</sup> cutting capacity offers an efficient alternative for demanding homeowners seeking extra freedom. Charging is automatic and installation and programming are facilitated using an easily navigated keypad. Smart design ensures your lawn is always in beautiful condition while an anti-theft alarm and unique PIN code offer maximum security.

**HUSQVARNA AUTOMOWER® 210 C.**

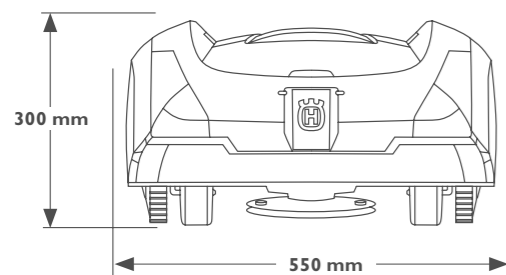

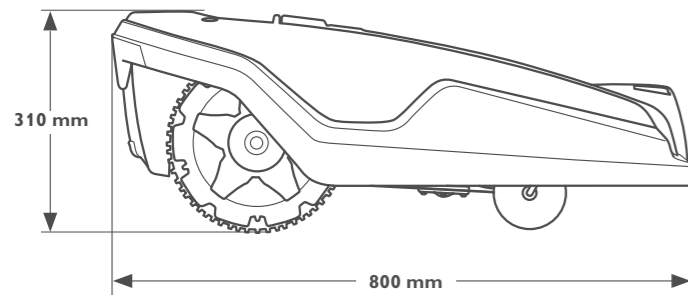

For lawn areas up to 500 m<sup>2</sup>, Husqvarna Automower® 210 C delivers practical, simple operation with outstanding results. Simply plug in the charging cord and let the mower charge over night, then the next day, the mower delivers several hours of cutting before it requires recharging. An efficient, desirable choice for homeowners with smaller or fragmented lawn areas.

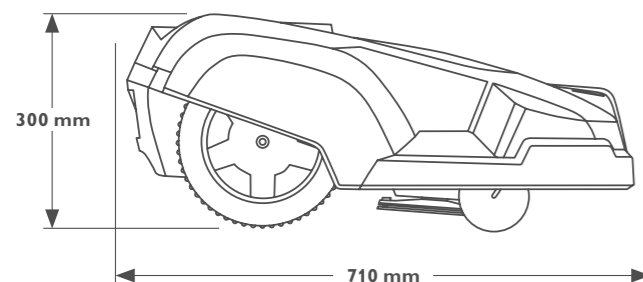

# Details and dimensions.

260 ACX

SOLAR HYBRID,  
230 ACX, 220 AC, 210 C

\* POWER RATING  
The power rating of the robotic lawnmowers indicated is the average net power output when cutting. Mass production mowers may differ from this value. Actual power output for the final machine will depend on the operating speed, environmental conditions and other variables.

# Set up.

Husqvarna Automower® is designed to operate with the absolute minimum human interaction. Smart programming and functionality also allow it to tackle any situation that might arise in the course of its cutting programme.

Lawn care has entered a new age. Noise, exhaust fumes and refuelling have been consigned to history. Lawn mowing as you know it has ceased to exist. Discover Husqvarna Automower® and join the quiet revolution.

## 1 - EASY INSTALLATION.

Simply lay out the boundary wire, secure with the staples supplied and the working area is defined.

## 2 - AUTOMATIC SHUT-OFF.

If the mower is lifted up, it automatically shuts off power to the cutting blade, increasing user safety.

## 3 - AVOIDS OBSTACLES.

A low voltage boundary wire means that obstacles and other hazards are skilfully avoided.

## 4 - NIGHT OR DAY, RAIN OR SHINE.

Unlike many lawn mower users, Husqvarna Automower® does not use the fact that it is raining to avoid cutting the lawn.

## 5 - GRADIENTS NO PROBLEM.

Hilly gardens with gradients up to 35 percent are no problem thanks to super grip and high motor power.

## 6 - INFORMATION PANEL.

Can be personalised to fit many different gardens and preferences. The mower is equipped with an anti-theft alarm and a unique PIN-code.

# Accessories.

These are just some of the accessories designed to make the job of mowing the lawn even easier. Discover these, and more, at your local Husqvarna Automower® dealer.

## 1 - AUTOMOWER® COLOUR COLLECTION.

Personalise your mower with a high quality metallic painted cover. Coloured in the four elements - earth, fire, water and air. Suitable for 220 AC and 230 ACX.

## 2 - HOUSING.

Provides additional protection for charging station and mower from sun and rain. Suitable for 220 AC and 230 ACX.

## 3 - WALL HANGER.

Frees up floor space during winter and when the mower is not used during summer. Suitable for all products except 260 ACX.

## 4 - SOFT CARRYING BAG.

A special carrying bag useful when moving Husqvarna Automower® between lawns. Suitable for all products.

## 5 - GPS COMMUNICATION UNIT.

GPS theft tracker. SMS alert. Settings changes can be handled from a distance as well as submitting current operating status. Suitable for all products except 210 C.

## 6 - REMOTE TEXT MESSAGING.

Possibility to send a text message to a pre programmed cell phone when an unscheduled STOP occurs. Suitable for all products except 210 C.

## 7 - WHEEL BRUSH KIT.

Keep the rear wheel clean for improved traction. Suitable for all products.

## 8 - WHEEL KIT FOR SLOPES.

Reduce problem of "wheelies", for mowers working on lawns with steep slopes. Suitable for all products except 260 ACX.

## 9 - SIGNAL BOOSTER.

Loop signal booster for long loop wire installations. Suitable for all products.
