

# Husqvarna launches new deep cutter

## — the K 760 Cut-n-Break cuts deep at a lower cost

*Now it's even easier to make deep cuts at a low cost. Husqvarna launches a new power cutter with the Cut-n-Break function; a unique method for making deep cuts in concrete. With a more powerful engine, better ergonomics and reduced emissions, the K 760 Cut-n-Break has all the requirements to be a hit with cutting and drilling contractors.*

A versatile all-round machine for cutting and drilling contractors who sometimes need to make deep cuts. That is one way to sum up the K 760 Cut-n-Break; Husqvarna's new power cutter which can handle cuts of up to 400 mm, with a lower tool cost than a diamond chain saw. The K 760 Cut-n-Break is the follow-up on the popular K 650 Cut-n-Break, Husqvarna's first machine with the revolutionary technique.

The technique and performance are significantly enhanced with the new cutter. The biggest innovation is an entirely new engine body – the K 760 Cut-n-Break is equipped with Husqvarna's low emission X-Torq® engine which makes the machine more powerful while being better on the environment at the same time. More power, 3.7 kW, means that the blade cuts through the concrete with more resilience and consistency. An improved ergonomic design is noticeable, among other things, in the form of a more robust front handle, making the grip more comfortable. An effective vibration dampening system and sound-dampening makes the machine more comfortable to use.

The K 760 Cut-n-Break diamond blades boast a new construction too, with a higher strength, which means they are more resistant to thermal strain. The double, specially developed 230 mm blades grant higher cutting speed and power. The areas of application for the K 760 Cut-n-Break are window, door, and ventilation openings where overcutting is to be avoided, grooves for cabling and crack renovation.

Husqvarna K 760 Cut-n-Break will be available on the market from the spring.

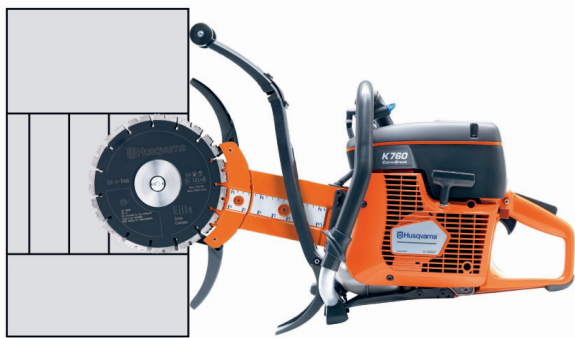

**Efficient.** With the new Husqvarna deep cutter, you easily cut in stages through walls of up to 400 mm thick. .

## More facts about the Husqvarna K 760 Cut-n-Break

- Air-cooled two stroke engine
- Power: 3.7 kW
- Diamond blades: 230 mm
- Cutting depth: 400 mm
- Weight: 11.3 kg including blades
- DuraStarter, dust and slurry protected starter and the durable starter cord reduce the risk of down-time, which means increased reliability and service life.
- SmartCarb, built-in automatic filter compensation, maintains high power and lowers fuel consumption.
- The new Active Air Filtration™, one of the most

efficient air filtration systems on the market, which increases filter working-life up to about one year of operational time on dry cutting.

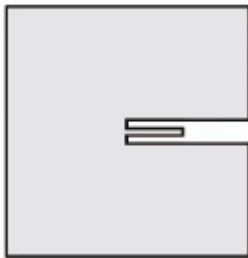

- Easy to start thanks to Air Purge and decompression valve.
- Effective vibration dampening system, less than or equal to 3.0 m/s<sup>2</sup>, and sound-dampening make the machine comfortable to use.
- Easy view fuel indicator displays the level of fuel in the tank.

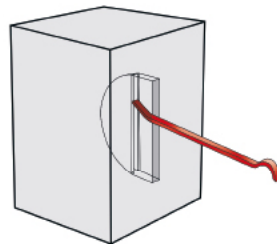

1.

### With the Cut-n-Break method you cut in stages through walls of up to 400 mm thick.

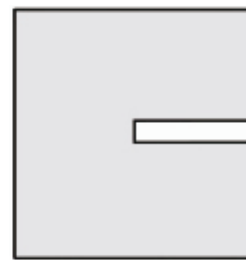

1. Each cut can be made to a maximum depth of 65 mm.
2. As the cutter is equipped with twin blades, a core is formed in the saw cut.
3. The core can easily be broken off, using the accompanying breaking tool.
4. When the core has been broken off, the cutting is repeated until the desired cutting depth is reached; 400 mm maximum.
