Introduction

Product description
This product is a brushcutter with a combustion engine. Work is constantly in progress to increase your safety and efficiency during operation. Speak to your servicing dealer for more information.

Intended use
Use the product with a saw blade, a grass blade or a trimmer head to cut different types of vegetation. Do not use the product for other tasks than grass trimming, grass clearing and forestry clearing. Use a saw blade to cut fibrous types of wood. Use a grass blade or trimmer head to cut grass.

Note: National or local regulations can regulate the use. Comply to given regulations.

Only use the product with accessories that are approved by the manufacturer. Refer to Accessories on page 27.

Product overview

1. Blade (not for all markets)
2. Grease filler cap, bevel gear
3. Bevel gear
4. Cutting attachment guard
5. Shaft
6. Start throttle button
7. Stop switch
8. Throttle control
9. Throttle lockout
10. Suspension ring
11. Cylinder cover
12. Starter rope handle
13. Fuel tank
14. Choke control
15. Air filter cover
16. Handlebar
17. Clutch cover
18. Locknut
19. Support flange
20. Support cup
21. Drive disc
22. Handlebar clamp
23. Operator's manual
24. Transport guard (not for all markets)
25. Socket wrench
26. Wrench
27. Locking pin (for products without hex key)
28. Harness
29. Air purge bulb
30. Guard extension
31. Trimmer head
32. Hex key
33. 2-teeth blade

Symbols on the product

WARNING: This product can be dangerous and cause serious injury or death to the operator or others. Be careful and use the product correctly.

Read the operator's manual carefully and make sure that you understand the instructions before use.

Use a protective helmet in locations where objects can fall on you. Use approved hearing protection and approved eye protection.

Maximum speed of the output shaft.

The product agrees with the applicable EC directives.

The product can cause objects to eject, which can cause injury.

Keep a minimum distance of 15 m / 50 ft. to persons and animals during operation of the product.

Risk of blade thrust if the cutting equipment touches an object that it does not immediately cut. The product can cut off body parts. Keep a minimum of 15 m / 50 ft. distance to persons and animals during operation of the product.

The arrows shows the limit for the handle position.

Choke.

Air purge bulb.

Use approved protective gloves.

Use heavy-duty slip-resistant boots.

Noise emission to the environment refer to the European Community's Directive. The emission of the product is specified in the Technical data chapter and on the label.

The rating plate shows the serial number. yyyy is the production year and ww is the production week.

Note: Other symbols/decals on the product refer to certification requirements for other commercial areas.

Product liability

As referred to in the product liability laws, we are not liable for damages that our product causes if:

- the product is incorrectly repaired.
- the product is repaired with parts that are not from the manufacturer or not approved by the manufacturer.
- the product has an accessory that is not from the manufacturer or not approved by the manufacturer.
- the product is not repaired at an approved service center or by an approved authority.
Safety definitions

The definitions below give the level of severity for each signal word.

⚠️ **WARNING:** Injury to persons.

⚠️ **CAUTION:** Damage to the product.

Note: This information makes the product easier to use.

General safety instructions

⚠️ **WARNING:** Read the warning instructions that follow before you use the product.

- Use the product correctly. Injury or death is a possible result of incorrect use. Only use the product for the tasks found in this manual. Do not use the product for other tasks.
- Obey the instructions in this manual. Obey the safety symbols and the safety instructions. If the operator does not obey the instructions and the symbols, injury, damage or death is a possible result.
- Do not discard this manual. Use the instructions to assemble, to operate and to keep your product in good condition. Use the instructions for correct installation of attachments and accessories. Only use approved attachments and accessories.
- Do not use a damaged product. Obey the maintenance schedule. Only do the maintenance work that you find an instruction about in this manual. An approved service center must do all other maintenance work.
- This manual cannot include all situations that can occur when you use the product. Be careful and use your common sense. Do not operate the product or do maintenance on the product if you are not sure about of the situation. Speak to a product expert, your dealer, service agent or approved service center for information.
- Disconnect the spark plug cable before you assemble the product, put the product into storage or do maintenance.
- Do not use the product if it is changed from its initial specification. Do not change a part of the product without approval from the manufacturer. Only use parts approved by the manufacturer. Injury or death is a possible result of incorrect maintenance.
- Do not breathe in the fumes from the engine. Long-term inhalation of the engine's exhaust fumes is a health risk.
- Do not start the product indoors or near flammable material. The exhaust fumes are hot and can contain a spark which can start a fire. Not sufficient airflow can cause injury or death because of asphyxiation or carbon monoxide.
- When you use this product the engine makes an electromagnetic field. The electromagnetic field can cause damage to medical implants. Speak to your physician and medical implant manufacturer before you operate the product.
- Do not let a child operate the product. Do not let a person without knowledge of the instructions operate the product.
- Make sure that you always monitor a person, with decreased physical capacity or mental capacity, that uses the product. A responsible adult must be there at all times.
- Lock the product in an area that children and unapproved persons cannot access.
- The product can eject objects and cause injuries. Obey the safety instructions to decrease the risk of injury or death.
- Do not go away from the product when the engine is on.
- The operator of the product is responsible if an accident occurs.
- Make sure that parts are not damaged before you use the product.
- Make sure that you are at minimum 15 m (50 ft) away from other persons or animals before you use the product. Make sure that persons in the adjacent area know that you will use the product.
- Refer to national or local laws. They can prevent or decrease the operation of the product in some conditions.
- Do not use the product if you are fatigued or influenced by alcohol, drugs or medicine. They can have effects on your vision, alertness, coordination or judgment.

Safety instructions for assembly

⚠️ **WARNING:** Read, understand and obey these instructions carefully before you use the product.

- Remove the spark plug cap from the spark plug before you assemble the product.
- Use approved protective gloves.
- When you use a saw blade or a grass blade, make sure that the correct handlebar, the blade guard and the harness are attached to the product.
• A defective or incorrect guard can cause injury. Do not use a cutting attachment that does not have an approved guard attached.
• Attach the clutch cover and shaft correct before you start the product to prevent the clutch to fall off.
• Make sure that you assemble the cover and shaft correct before you start the engine.
• The drive disc and support flange must engage correctly in the centre hole of the cutting attachment. A cutting attachment that is attached incorrectly can cause injury or death.
• To operate the product safely and prevent injury to the operator or other persons, the product must always be attached correctly to the harness.

Safety instructions for operation
• Make sure the product is fully assembled before you use it.
• Before a start, move the product 3 m (10 ft) away from the position where you filled the fuel tank. Put the product on a flat surface. Make sure that the cutting attachment does not touch the ground or other objects.
• The product can cause objects to eject, which can cause damage to the eyes. Always use an approved eye protection when you operate the product.
• Be careful, a child can come near the product without your knowledge during operation.
• Do not operate the product if there are persons in the work area. Stop the product if a person goes into the work area.
• Make sure that you are always in control of the product.
• Do not use the product if you cannot receive aid if an accident occurs. Always make sure others know you will operate the product before you start to operate the product.
• Do not sit with the product before you make sure that no persons or animals are in the safety area.
• Remove all unwanted materials from the work area before you start. If the cutting attachment hits an object, the object can eject and cause injury or damage. Unwanted material can wind around the cutting attachment and cause damage.
• Do not use the product in bad weather (fog, rain, strong winds, risk of lightning or other weather conditions.). Dangerous conditions (such as slippery surfaces) can occur because of bad weather.
• Make sure that you can move freely and work in a stable position.

WARNING: Read the warning instructions that follow before you use the product.

• Always use correct personal protective equipment when you operate the product. The personal protective equipment does not erase the risk of injury. The personal protective equipment decreases the grade of injury if an accident occurs.
• Always use an approved eye protection while you operate the product.
• Do not operate the product with bare feet or with open shoes. Always use heavy-duty slip-resistant boots.
• Use heavy, long pants.
• If it is necessary, use approved protective gloves.
• Use a helmet if it is possible that objects fall on your head.
• Always use approved ear protection while you operate the product. Noise for a long period can cause noise-induced hearing loss.
• Make sure that you have a first aid kit near.

Protective devices on the product
• Make sure that you regularly do the maintenance to the product.
  • The life of the product increases.
  • The risk of accidents decreases.

Let an approved dealer or an approved service center regularly examine the product to do adjustments or repairs.
• Do not use a product with damaged protective equipment. If the product is damaged, speak to an approved service center.

To do a check of the throttle trigger lockout
1. Make sure that the throttle trigger lockout (A) and throttle trigger (B) move freely and that the return spring operates correctly.
2. Push down the throttle trigger lockout and make sure that it goes back to its initial position when you release it.
3. Make sure that the throttle trigger is locked at the idle position when the throttle trigger lockout is released.
4. Start the product and apply full throttle.
5. Release the throttle trigger and make sure that the cutting attachment stops and stays stationary.

WARNING: If the cutting attachment moves when the throttle trigger is in the idle position, then the carburetor idle speed must be adjusted. Refer to To adjust the idle speed on page 22.

To do a check of the stop switch
1. Start the engine.
2. Move the stop switch to the stop position and make sure that the engine stops.

To do a check of the cutting attachment guard
The cutting attachment guard prevents injuries and stops objects that eject in the direction of the operator.
1. Stop the engine.
2. Do a visual check for damages, for example cracks.

3. Replace the cutting attachment guard if it is damaged.

To do a check of the vibration damping system
The vibration damping system decreases vibration in the handles to a minimum which makes the operation easier.

1. Stop the engine.
2. Do a visual check for deformation and damage, for example cracks.
3. Make sure that the elements of the vibration damping system are attached correctly.

To do a check of the quick-release mechanism

⚠️ WARNING: Do not use a harness with a defective quick-release mechanism.

The quick-release mechanism lets the operator remove the product quickly from the harness if there is an emergency.

1. Stop the engine.
2. Do a visual check for damage, for example cracks.
3. Release and attach the quick-release mechanism to make sure that it operates correctly.

To do a check of the muffler

⚠️ WARNING: Never use a product with a faulty muffler.

⚠️ WARNING: Bear in mind that the exhaust fumes from the engine are hot and may contain sparks which can start a fire. Never start the product indoors or near combustible material!

The muffler keeps noise levels to a minimum and sends exhaust fumes away from the operator. For mufflers it is very important that you follow the instructions on how to check, maintain and service your product.

Regularly check that the muffler is securely attached to the product.
To attach and remove the locknut

**WARNING:** Stop the engine, use protective gloves and be careful around the sharp edges of the cutting attachment.

A locknut is used to attach some types of cutting attachments. The locknut has a left thread.

- To attach, tighten the locknut in the opposite direction to the direction of turning of the cutting attachment.
- To remove the locknut, loosen the locknut in the same direction as the cutting attachment rotates.
- To loosen and tighten the locknut, use a socket wrench with a long shaft. The arrow in the picture shows the area where you can operate the socket wrench.

**WARNING:** When you loosen and tighten the locknut, there is a risk of injury from the blade. You must always make sure that the blade guard prevents injury to your hand when you do this.

**Note:** Make sure that you can not turn the locknut by hand. Replace the nut if the nylon lining does not have a resistance of a minimum of 1.5 Nm. The locknut must be replaced after it has been put on approximately 10 times.

**Cutting equipment**

Choose and maintain the cutting equipment to:

- Obtain maximum cutting performance.
- Increase life span of the cutting equipment.
- Follow the checking, maintenance and service instructions for the muffler.
- Always use the recommended guard for the cutting equipment. See Technical data.
To sharpen grass cutters and grass blades on page 24 and use the recommended file gauge.

- Examine the cutting attachment for damage and cracks. Replace the damaged cutting attachment.
- Only use cutting attachments with recommended guards. Refer to Accessories on page 27.

**Trimmer head**

**WARNING:** Always make sure that the trimmer line is wound tightly and equally around the drum to prevent harmful vibration.

- Only use recommended trimmer heads and trimmer lines.
- Only use recommended cutting attachments.
- The length of the trimmer line is important. For a longer trimmer line, more engine power is necessary than for a shorter trimmer line of the same diameter.
- Do not move the installation position of the trimmer guard.
- Make sure that the cutter on the trimmer guard is not damaged. The cutter cuts the trimmer line to the correct length.
- Soak the trimmer line for 2 days before use, to increase its life length.

**Grass blades and grass cutters**

- Use the product with an approved grass blade. Do not use a grass blade without proper installation of all required parts. Make sure that the installation is done correctly and that the proper parts are used. Improper installation may cause the blade to fly off and seriously injure the operator or the bystanders.
- Wear protective gloves when you handle or do maintenance on the blade.
- Use head protection when you operate a product with a grass blade.
- Grass blades and grass cutters are used to cut rough grass.

- A grass blade can cause injury while it continues to spin after the engine is stopped or the throttle trigger is released. Make sure that the grass blade has completely stopped rotating before any maintenance.
- Stop the engine before you do work on the cutting attachment. Make sure the cutting attachment fully stops. Disconnect the lead from the spark plug.
- Only use an approved cutting attachment or a correctly sharpened blade.
- Keep the teeth of the blade correctly sharpened.
- Do not use a damaged cutting attachment.
- Attach the transport guard to the grass blade when you transport or store the product.

**Blade thrust**

- A blade thrust is a sudden movement of the product to the side, forward or rearward. A blade thrust occurs when the grass blade hits an object that cannot be cut. In areas where it is not easy to see the material being cut the risk of blade thrust increases.
- When a blade thrust occurs, there is a risk that the product or the operator moves out of position. A blade that moves can hit bystanders and there is a risk of injuries.
- If a blade is bent, has cracks, is broken or damaged, discard the blade.
- Use a sharp blade. The risk of blade thrust increases when a blade is not sharp.

**Fuel safety**

- Do not start the product if there is fuel or engine oil on the product. Remove the unwanted fuel/oil and let the product dry. Remove unwanted fuel from the product.
- If you spill fuel on your clothing, change clothing immediately.
- Do not get fuel on your body, it can cause injury. If you get fuel on your body, use a soap and water to remove the fuel.
- Do not start the engine if you spill oil or fuel on the product or on your body.
- Do not start the product if the engine has a leak. Examine the engine for leaks regularly.
- Be careful with fuel. Fuel is flammable and the fumes are explosive and can cause injuries or death.
- Do not breathe in the fuel fumes, it can cause injury. Make sure that there is a sufficient airflow.
- Do not smoke near the fuel or the engine.
- Do not put warm objects near the fuel or the engine.
- Do not add the fuel when the engine is on.
- Make sure that the engine is cool before you refuel.
- Before you refuel, open the fuel tank cap slowly and release the pressure carefully.
• Do not add fuel to the engine in an indoor area. Not sufficient airflow can cause injury or death because of asphyxiation or carbon monoxide.
• Tighten the fuel tank cap carefully or a fire can occur.
• Move the product at a minimum of 3 m (10 ft) from the position where you filled the tank before a start.
• Do not put too much fuel in the fuel tank.
• Make sure that a leak cannot occur when you move the product or fuel container.
• Do not put the product or a fuel container where there is an open flame, spark or pilot light. Make sure that the storage area does not contain an open flame.
• Only use approved containers when you move the fuel or put the fuel into storage.
• Empty the fuel tank before long-term storage. Obey the local law on where to dispose fuel.
• Clean the product before long-term storage.
• Remove the spark plug cable before you put the product into storage to make sure that the engine does not start accidentally.

Safety instructions for maintenance
• If you cannot adjust the idle speed to make the cutting attachment stop, speak to your service center. Do not use the product until the product is correctly adjusted or repaired.

Assembly

WARNING: Read the safety chapter before you assemble the product.

Introduction

WARNING: Before you assemble the product, you must read and understand the safety chapter.

WARNING: Remove the spark plug cable from the spark plug before you assemble the product.

To install the body of the product
• Attach the engine (A) to the tube (B) with 4 screws (C).

To install the handlebar
1. Install the handlebar in the handlebar clamp on the shaft.

2. Install the protective sleeve.
To connect the throttle cable and stop switch wires

1. Remove the air filter cover.
2. Install the throttle cable (A) through the carburetor bracket (B).
3. Turn the cable adjuster sleeve (C) into the carburetor bracket fully.
4. Put the slot fitting (D) on the carburetor. At this time, the recessed hole (E) for the cable lug (F) is away from the cable adjuster sleeve (C).
5. Rotate the carburetor throttle cam and move the throttle cable (A) through the slot in the slot fitting.
6. Make sure the cable lug (F) drops into the recessed hole.
7. Operate the throttle trigger some times to make sure that it operates correctly.
8. Adjust the cable adjuster sleeve (C).
   a) Make sure the stop on the carburetor throttle cam touches the throttle stop correctly.
   b) Make sure the cable position keeps 1-2 mm between cable lug (F) and slot fitting when the throttle trigger is fully released.
9. When the throttle cable (A) is adjusted correctly, tighten the locknut (G).
10. Connect the stop switch wires (H) with the connectors from the engine.
11. Install the stop switch wires and connectors with clamp (I).
12. Install the dust cover (J).
13. Install the air filter cover.

To install blades and trimmer heads

**WARNING:** Only use the approved guard for the blades. See Accessories on page 27. A defective guard can cause injury.

**WARNING:** If you operate the product with a grass blade, first install the correct handlebar, blade guard and harness.

**WARNING:** If you do not install the the blades correctly, it can cause injury.

1. Make sure that the lifted section on the drive disc/support flange engages correctly in the center hole of the blades.
2. Install the blades.

To attach and remove the guard extension
The guard extension is used on the cutting attachment guard. Attach the guard extension when you use a trimmer head or plastic blades. Remove the extension guard when you use a grass blade.
• Put the guide on the guard extension into the slot on the cutting attachment guard. Lock the 4 locking hooks into position.
• Release the locking hooks with a screwdriver to remove the guard extension.

To install the blade guard

CAUTION: Only use the approved guard for the blades. Refer to Accessories on page 27.

1. Remove the bracket (H).
2. Attach the adapter (I) and bracket (J) with the 2 screws (K).

To install the saw blade

WARNING: There is a risk of injury around the saw blade nut. Make sure that the blade guard is correctly installed. Always use protective gloves.

1. Attach the drive disc (B) to the output shaft.
2. Turn the blade shaft until one of the holes in the drive disc aligns with the hole in the gear housing.
3. Put the locking pin or hex key (C) in the hole to lock the shaft.
4. Install the saw blade (D) and the support flange (F) to the output shaft.
5. Install the saw blade nut (G).

Note: The saw blade nut has a left hand thread.
6. Turn the socket wrench counterclockwise to tighten the locknut. Make sure that the torque of the locknut is 35-50 Nm (3.5-5 kpm). Hold the shaft of the socket wrench as near the blade guard as possible.
a) Make sure that you operate the socket wrench in the identified area when you loosen or tighten the saw blade nut.

To attach a blade guard, grass blade and grass cutter

**CAUTION:** Make sure that the guard extension is removed.

**Note:** Use the recommended blade guard. Refer to *Accessories on page 27.*

1. Install the blade guard to the shaft. Attach the blade guard with the bolt (L).

2. Attach the drive disc (B) to the output shaft.

3. Turn the output shaft until 1 of the holes in the drive disc aligns with the hole in the gear housing.

4. Put the locking pin or hex key (C) into the hole to lock the shaft.

5. Put the blade (D), support flange (E) and support cup (F) on the output shaft.

6. Install the nut (G). Use the combination wrench and tighten the nut to torque 35-50 Nm. Hold the shaft of the combination wrench as near the blade guard as possible.

7. To tighten the nut, turn the combination wrench in the opposite direction to the direction of rotation.

**Note:** Left hand thread.

To attach the trimmer guard and the trimmer head

**Note:** Make sure to use the correct trimmer guard for the correct trimmer head.

1. Attach the correct trimmer guard/combination guard (A) for the trimmer head.

2. Hang the trimmer guard/combination guard (A) on the 2 hooks on the plate holder (M).

3. Install the trimmer guard/combination guard around the shaft and tighten it with the bolt (L). Use the locking pin or hex key (C).

4. Put the locking pin or hex key (C) in the groove on the screw head and tighten.

5. Attach the drive disc (B) and support flange (E) on the output shaft.

6. Turn the output shaft until one of the holes in the drive disc aligns with the hole in the gear housing.
7. Install the locking pin or hex key (C) in the hole to lock the shaft.

8. Assemble the trimmer head/plastic blades (H). Turn the trimmer head/plastic blades counterclockwise.

9. To disassemble, follow the instructions in the opposite sequence.

**To install the transport guard**

1. Install the blade in the transport guard (A).
2. Put the two fasteners (B) into the slots (C) to attach the transport guard.

**To install the 2-teeth blade in the guard**

1. Install the blade in the transport guard.

---

**To adjust the harness**

**WARNING:** The product must always be correctly attached to the harness. Do not use a defective harness.

1. Put on the harness.
2. Connect the product to the harness.
3. Adjust the harness for the best work position.
4. Adjust the side straps to make the product weigh equally on your shoulders.
5. Adjust the harness until the cutting attachment is parallel to the ground.
6. Let the cutting attachment lightly touch the ground. Adjust the harness clamp to balance the product correctly.

**Note:** If you use a grass blade, it must balance approximately 10 cm /4 in above the ground.

---

**Operation**

**WARNING:** Read and understand the safety chapter before you operate the product.

---

**Introduction**

**WARNING:** Before you operate the product, you must read and understand the safety chapter.
Fuel

To use fuel

CAUTION: This product has a two-cycle engine. Use a mixture of gasoline and two-cycle engine oil. Make sure to use the correct quantity of oil in the mixture. Incorrect ratio of gasoline and oil can cause damage to the engine.

Husqvarna alkylate fuel

We recommend you to use Husqvarna alkylate fuel for best performance. The fuel contains less dangerous material compared to regular fuel, which decreases dangerous exhaust fumes. The fuel gives a low quantity of dangerous remainings when it is combusted, which keeps the components of the engine more clean. This extends the life of the engine. Husqvarna alkylate fuel is not available in all markets.

Gasoline

CAUTION: Do not use gasoline with an octane number less than 90 RON (87 AKI). This can cause damage to the product.

CAUTION: Do not use gasoline with more than 10% ethanol concentration (E10). This can cause damage to the product.

CAUTION: Do not use leaded gasoline. This can cause damage to the product.

- Always use new unleaded gasoline with a minimum octane number of 90 RON (87 AKI) and with less than 10% ethanol concentration (E10).
- Use gasoline with a higher octane number if you frequently use the product at continuously high engine speed.
- Always use a good quality unleaded gasoline/oil mixture.

Two-cycle engine oil

- Use only the two-cycle engine oil of high quality, especially HUSQVARNA two-cycle oil. Use only the oil of an air cooled engine.
- Mixture ratio 50:1 (2%).
- Oil of low quality and high oil/fuel ratio can decrease the lifetime of catalytic converters.
- Speak to your dealer when you select an oil.
- If Husqvarna two-stroke oil is not available, you can use another two-stroke oil of good quality that is intended for air cooled engines. Contact your dealer when you select oil.
- Do not use the two-stroke oil for water-cooled outboard engines. The two-stroke oil is sometimes referred to as outboard oil.

To make the fuel mixture

Note: Always use a clean fuel container when you mix the fuel.

Note: Do not make more than 30 days quantity of fuel mixture.

1. Add half of the gasoline quantity.
2. Add the full quantity of oil.
3. Shake the fuel mixture to mix the contents.
4. Add the remaining gasoline quantity.
5. Shake the fuel mixture to mix the contents.
6. Fill the fuel tank.

To add fuel

WARNING: Do not smoke or put hot objects near fuel. Before you add fuel, stop the engine and let it cool for minutes.

WARNING: When you add fuel, open the fuel tank cap slowly to release unwanted pressure.

WARNING: After you add fuel, tighten the fuel tank cap carefully. Move the machine away from the refuelling area and the power before you start the engine.

- Always use a fuel container with an anti-spill valve.
- Make sure that the area near the fuel tank cap is clean. Contamination in the tank can cause operating problems.
- Shake the fuel container before you add the fuel mixture to the fuel tank.

To start and stop

Before you operate the product

- Examine the work area to make sure that you know the type of terrain, the slope of the ground and if
there are obstacles such as stones, branches and ditches.

- Do an overhaul inspection of the product.
- Do the safety inspections, maintenance and servicing that are given in this manual.
- Make sure that all covers, guards, handles and the cutting equipment are correctly attached and not damaged.
- Make sure that there are no cracks at the bottom of the saw blade or grass blade teeth or by the center hole of the blade. Replace the blade if it is damaged.

- Examine the support flange for cracks. Replace the support flange if it is damaged.

- Make sure that the locknut can not be removed by hand. If you can remove it by hand, it does not lock the cutting attachment sufficiently and you must replace it.

- Examine the blade guard for damages or cracks. Replace the blade guard if it has been hit or if it has cracks.

- Examine the trimmer head and cutting attachment guard for damages or cracks. Replace the trimmer head and cutting attachment guard if they have been hit or if they have cracks.

To start a cold engine

1. Move the stop switch to the start position.
2. Push the air purge bulb until fuel starts to fill the air purge bulb.
3. Move the choke control to the choke position.
4. Hold the product to the ground.
5. Pull the starter rope handle slowly with your right hand until you feel resistance.

**WARNING:** Do not wind the starter rope around your hand.

**CAUTION:** Do not pull the starter rope to full extension and do not let go of the starter rope handle. This can cause damage to the product.

6. Pull the starter rope handle quickly and with force until the engine starts.

7. Set the choke control to the operation position.

**WARNING:** Keep body parts away from the spark plug cap. Risk of burn injuries. Do not use the product with a damaged spark plug cap. Risk of electrical shock.

**To start a warm engine**

1. Move the stop switch to the start position.
2. Push the air purge bulb until fuel starts to fill the air purge bulb.
3. Set the choke control to the operation position, then pull the starter rope handle until the engine starts.

**To start with a throttle handle with a start throttle lock**

1. Push the throttle lockout and the throttle trigger to set the throttle to the start position. Then push the start throttle button (A).
2. Release the throttle lockout and the throttle trigger, followed by the start throttle button. The throttle function is now activated.
3. To return the engine to idle speed, push the throttle lockout and throttle trigger again.

**To stop the engine**

1. Push the throttle trigger to the idle position.
2. Move the stop switch to the stop position.

**To operate the grass trimmer**

**CAUTION:** Make sure that you slow the engine to idle speed after each operation. A long period at full throttle without a load on the engine can cause damage to the engine.

**Note:** Clean the cover of the trimmer head when you attach a new trimmer line to prevent vibrations. Examine other parts of the trimmer head and clean if it is necessary.
General work instructions

WARNING: Be careful when you cut a tree that is in tension. It can spring back to its normal position before or after the cut and hit you or the product, and cause injury.

- Clear an open space at one end of the work area, and start the work from there.
- Move in a regular pattern across the work area.
- Move the product fully to the left and right, to clear a width of 4–5 m (13-16 ft) on each turn.
- Clear a length of 75 m (250 ft) before you turn and go back. Move the fuel can along with you as you continue.
- Move in a direction where you do not go across ditches and obstacles more than necessary.
- Move in a direction where the wind makes the cut vegetation fall in the cleared area.
- Move along slopes, not up and down.

Blade thrust

A blade thrust is when the product moves to the side quickly and with force. A blade thrust occurs when the grass blade or saw blade hits or catches on an object that cannot be cut. A blade thrust can eject the product or operator in all directions. There is a risk of injury to the operator and bystanders.

The risk increases in areas where it is not easy to see the material that is cut.

Do not cut with the area of the blade that is shown in black. The speed and movement of the blade can cause blade thrust. The risk increases with the thickness of the branch that is cut.

Forestry clearing with a saw blade

To fell a tree to the left
To fell to the left, push the bottom of the tree to the right.
1. Apply full throttle.
2. Put the saw blade against the tree as given in the picture.
3. Tilt the saw blade and push it with force diagonally down to the right. At the same time, push the tree with the blade guard.

To fell a tree to the right
To fell to the right, push the bottom of the tree to the left.
1. Apply full throttle.
2. Put the saw blade against the tree as given in the picture.
3. Tilt the saw blade and push it with force diagonally up and to the right. At the same time, push the tree with the blade guard.
To fell a tree forward
To fell forward, push the bottom of the tree rearward.
1. Apply full throttle.
2. Put the saw blade against the tree as given in the picture.
3. Pull the saw blade forward with a fast movement.

To fell large trees
Large trees must be cut from 2 sides.
1. Examine in which direction the tree will fall.
2. Apply full throttle.
3. Do the first cut on the side of the tree to which it will fall.
4. Cut through the tree from the other side.

CAUTION: If the saw blade becomes blocked, do not pull the product with a sudden movement. That can cause damage to the saw blade, bevel gear, shaft or handlebar. Release the handles, hold the shaft with 2 hands and carefully pull the product.

Note: Use more cutting pressure to fell small trees. Use less cutting pressure to fell large trees.

Brush cutting with a saw blade
To fell to the left, push the bottom of the tree to the right.
- Cut down thin trees and brush.
- Move the product from side to side.
- Cut many trees in one movement.
- For groups of thin trees:
  a) Cut the outer trees high up.
  b) Cut the outer trees to the correct height.
  c) Cut from the center. If you cannot get access to the center, cut the outer trees high up and let them fall. This decreases the risk that the saw blade becomes blocked.

To clear grass with a grass blade
1. Keep your feet apart during operation of the product. Make sure feet are tightly against the ground.
2. Put the support cup lightly on the ground. This prevents the blade from touching the ground.
3. Use a sideway movement from right to left for a clear stroke. Use the left side of the blade (between 8 and 12 o’clock) to cut.
4. Angle the blade to the left when you clear grass.

Note: The grass collects easily in a line.
5. Use a sideway movement from left to right for the return stroke.
6. Do the work rhythmically.
7. Move forward and keep feet tightly against the ground.
8. Stop the engine.
9. Remove the product from the clip on the harness.
10. Put the product on the ground.
11. Collect the cut material.

To clear

To achieve the best results:
• Hold the trimmer so that the trimmer head is just above the ground.
• Tilt the trimmer head at a slight angle.
• Let the end of the trimmer line strike the ground around objects

To trim the grass
1. Hold the trimmer head immediately above the ground at an angle. Do not push the trimmer line into the grass.
2. Decrease the length of the trimmer line by 10-12 cm / 4-4.75 in.
3. Decrease the engine speed to decrease the risk of damage to plants.
4. Use 80 % throttle when you cut grass near objects.

To cut the grass
1. Make sure that the trimmer line is parallel to the ground when you cut.
2. Do not push the trimmer head to the ground. The ground and the product can be damaged.
3. Do not let the trimmer head touch the ground continuously, it can cause damage to the trimmer head.
4. Use full throttle when you move the product from side to side to cut grass.

To sweep the grass
The airflow from the rotating trimmer line can be used to remove cut grass from an area.
1. Hold the trimmer head and its trimmer line parallel to the ground and above the ground.
2. Apply full throttle.
3. Move the trimmer head from side to side and sweep the grass.

WARNING: Clean the trimmer head cover each time you assemble new trimmer line to prevent unbalance and vibrations in the handles. Also do a check of the other parts of the trimmer head and clean it if necessary.

To replace trimmer line
Refer to the last page of this operator's manual.
## Maintenance

**WARNING:** Read and understand the safety chapter before you clean, repair or do maintenance on the product.

### Maintenance schedule

<table>
<thead>
<tr>
<th>Maintenance</th>
<th>Daily</th>
<th>Weekly</th>
<th>Monthly</th>
</tr>

</tbody>
</table>
To adjust the carburetor

The basic carburetor settings are adjusted during testing at the factory. Adjustment must be carried out by a trained technician.

To do a check of the muffler

- **WARNING:** Do not use a product that has a defective muffler. Always replace a defective muffler.
- **WARNING:** Risk of burn or fire. Mufflers with catalytic converters get very hot during operation.
- **WARNING:** Risk of fire. The muffler decreases the noise level and identifies the exhaust gases from the operator. The exhaust gases are hot and can contain sparks.
- **CAUTION:** The spark arrester screen must be replaced if it is damaged. Do not use a product if the spark arrester screen on the muffler is missing or defective.
- **CAUTION:** If the spark arrester screen is blocked, the product will be too hot. This will cause damage to the cylinder and piston.

1. Make sure that the muffler is not damaged.
2. Make sure that the muffler is correctly attached to the product.

To adjust the idle speed

Your Husqvarna product is made to specifications that decrease harmful emissions.

1. Make sure that the air filter is clean and the air filter cover is attached before you adjust the idle speed.
2. Adjust the idle speed with the idle speed screw T which is identified with "T" mark.

Note: Refer to Technical data on page 26 for the recommended idle speed.

Air filter

- Clean the filter at intervals of 25 hours. Clean more regularly if necessary.
• Set the choke control in the choke position.

To clean the air filter

CAUTION: Always replace an air filter that is damaged, very dirty or soaked with fuel.

If you use an air filter for a long time, it cannot be fully cleaned. Replace the air filter with a new one at regular intervals.

1. Close the choke valve.
2. Remove the air filter cover.
3. Remove the air filter.
4. Clean the air filter with warm soap water.
5. Make sure that the air filter is dry.
6. Replace the air filter if it is too dirty to fully clean it. Always replace a damaged air filter.
7. Clean the inner surface of the air filter cover. Use air or a brush.
8. Use Husqvarna two-stroke oil to put oil on the air filter. If there is too much oil on the air filter, remove the unwanted oil before you install the air filter.

To apply oil to the foam air filter

WARNING: Put on protective gloves. The air filter oil can cause skin irritation.

1. Put the foam air filter in a plastic bag.
2. Put the oil in the plastic bag.
3. Rub the plastic bag to supply the oil equally across the foam air filter.
4. Push the unwanted oil out of the foam air filter while in the plastic bag.

Felt filter

• Hit the felt filter carefully against your hand or use compressed air to clean the felt filter.

CAUTION: Do not use water to clean the felt filter. Water can cause damage to the felt filter.

Fuel filter

When the engine runs short of fuel supply, make sure that the fuel tank cap and the fuel filter (A) is not blocked.
To add grease to the bevel gear

- Make sure that the bevel gear is filled 3/4 full with bevel gear grease.

To examine the spark plug

**CAUTION:** Always use the recommended spark plug type. Incorrect spark plug type can cause damage to the product.

- Examine the spark plug if the engine is low on power, is not easy to start or does not operate correctly at idle speed.
- To decrease the risk of unwanted material on the spark plug electrodes, obey these instructions:
  a) Make sure that the idle speed is correctly adjusted.
  b) Make sure that the fuel mixture is correct.
  c) Make sure that the air filter is clean.
- If the spark plug is dirty, clean it and make sure that the electrode gap is correct, refer to *Technical data on page 26.*
- Replace the spark plug if it is necessary.

To sharpen grass cutters and grass blades

- Sharpen all edges of the grass cutters and blades equally to keep the balance. Use a single-cut flat file.

To sharpen the saw blade

**WARNING:** Stop the engine. Use protective gloves.

- To sharpen the blade correctly, refer to the instructions that come with the blade.
- Make sure that the product and blade has sufficient support when you sharpen it.
- Use a 5.5 mm (7/32 in) round file with a file holder.
- Hold the file at an angle of 15°.
• Sharpen one tooth of the saw blade to the right and the next tooth to the left, see the illustration.

Note: Sharpen the edges of the teeth with a flat file if the blade is heavily worn. Continue to sharpen with a round file.

• Sharpen all edges equally to keep the blade balanced.

• Adjust the blade set to 1 mm (0.04 in) with the recommended setting tool. Refer to the instructions that come with the blade.

WARNING: Always discard a blade that is damaged. Do not try to make a bent or twisted blade straight and use it again.

Troubleshooting

Transportation and storage

- Keep equipment safe during transportation to prevent damage and accidents.
- Keep the product and equipment in a dry and frost-proof area.
- Clean the product.
- Replace or repair damaged components.
- Use the correct protective cover on the product that does not keep moisture.
- Keep the product tightly attached during transport.

Noise emissions

1 Noise emissions in the environment measured as sound power (LWA) in conformity with EC directive 2000/14/EC. Reported sound power level for the machine has been measured with the original cutting attachment that gives the highest level. The difference between guaranteed and measured sound power is that the guaranteed sound power also includes dispersion in the measurement result and the variations between different machines of the same model according to Directive 2000/14/EC.

### Sound levels

Equivalent sound pressure level at the operator’s ear, measured according to EN ISO 11806 and EN ISO 22868, dB(A)

| Equipped with trimmer head (original) | 98 |
| Equipped with grass blade (original) | 95 |
| Equipped with saw blade (original) | 96 |

### Vibration levels

Equivalent vibration levels ($a_{hv,eq}$) at handles, measured according to EN ISO 11806 and EN ISO 22867, m/s²

| Equipped with trimmer head (original), left/right | 3.3/4.6 |
| Equipped with grass blade (original), left/right | 4.0/6.3 |
| Equipped with saw blade (original), left/right | 3.5/5.1 |

2 Reported data for equivalent sound pressure level for the machine has a typical statistical dispersion (standard deviation) of 1 dB(A).

3 Reported data for equivalent vibration level has a typical statistical dispersion (standard deviation) of 1 m/s².
EC Declaration of Conformity

Husqvarna AB, SE-561 82 Huskvarna, Sweden, tel: +46-36-146500, declares that the brushcutter Husqvarna 143R-II with serial numbers dating from 2016 onwards (the year is clearly stated on the rating plate, followed by the serial number), comply with the requirements of the COUNCIL’S DIRECTIVE:

• of May 17, 2006 “relating to machinery” 2006/42/EC.
• of February 26, 2014 “relating to electromagnetic compatibility” 2014/30/EU.
• of May 8, 2000 “relating to the noise emissions in the environment” 2000/14/EC. Conformity assessment according to Annex V. For information relating to noise emissions, refer to Technical data on page 26.

The following standards have been applied:

Huskvarna, 2016-03-30

Per Gustafsson, Development Manager (Authorized representative for Husqvarna AB and responsible for technical documentation)
